

# POLYGON 30

100% DECENTRALIZED SOLIDARITY

# SOLIDARITY

There is no force stronger than the human will. Our mission is to build a solidarity economy system in which each of us is the catalyst for the necessary changes to improve individual and collective quality of life.

# 100% **DECENTRALIZED** PROJECT

**No Company**

**100% Decentralized**

**No MD/CMD**

**100% Verified Smart Contract**

**No Admin**

**100% Safe and Secure**

**No Closing**

**100% Transparent**

**No Pay out System**

**P2P Transaction**

# DECENTRALIZATION

## Polygon (MATIC)

Our system works in a "decentralized" way through an automated contract that offers maximum security and sustainability. A smart contract is a self-executing algorithm that, in this case, exists within the Polygon (Matic) NETWORK Smart Chain. Smart contracts, like cryptocurrencies, are decentralized and work without the possibility of subsequently modifying the previously defined execution. The code that contains all the logic of the contract is on the blockchain and millions of computers around the world provide all the calculations, this ensures that there is no risk of hacking the smart contract or stopping the project.

# ADVANTAGES OF SMART CONTRACTS

## ➤ Security

As the distributed ledger is impregnable and immune to alterations

## ➤ Disintermediation

Enables parties to enter into agreements with reduced dependence on middlemen

## ➤ Real-time execution

As it takes place almost simultaneously for all parties, across participating computers, once the necessary criteria are satisfied.

## ➤ Transparency

Creates an environment of trust as the logic and information in the contract is visible to all participants in the blockchain network.

# RE-JOINGING

## Polygon CYCLE

The last 4 spots from the 4th line (25% + 25% + 25% + 25%) are summed up and 100% is distributed to upline partners, and a new cycle of the slot begins automatically.
